## At Wilcox **QUALITY** is #1

- ✓ All wiring is soldered and heat shrink
- ✓ Water proof exterior wiring connectors
- ✓ Poly gaskets behind all locks & hinges
- ✓ Extensive 3 stage "green" cleaning process prior to paint
- ✓ Use stainless steel fasteners and hardware exclusively

## ALUMINUM SERVICE BODIES

The **Wilcox Aluminum Service Body** has all the great quality and features built into our Steel Service bodies with the added benefits of aluminum's light weight and rust-free properties plus:

### STANDARD ALUMINUM BODY FEATURES:

- .125 Tops, Sides and Bottoms
- 3/16" aluminum checker plate floor
- .125 Aluminum Headboard
- Heavy Duty aluminum checker plate bumper

### WHY ALUMINUM?

- **Reduced Weight** - Average weight reduction of 30% over Steel
- **Reduced Fuel and Emissions** - Save up to 12% fuel usage by switching to Aluminum & reduce harmful environment emissions
- **Reduce Maintenance Costs** - Lower weight results in less wear in tear on your vehicles suspension, breaks and tires
- **Improved Durability** - Aluminum is rust resistant, increasing the lifecycle of your body
- **Higher Resale Value** - Commercial vehicles with aluminum components maintain their value resulting in higher residual value
- **Safety Performance** - Aluminum can absorb nearly twice as much impact energy as steel
- **Driving Performance** - Light weight aluminum bodies result in improved acceleration and braking due to weight savings

## STEEL SERVICE BODIES

The **Wilcox Steel Service Body** is a perfect addition to your work fleet. Built with the highest quality standards including stainless steel locks, hinges and hardware the Wilcox Steel Service Body is built to last.

With the Wilcox Steel Service Body you get much more, including standard 12 gauge tops for superior strength and durability, automotive weather stripping and all of our bodies are welded by certified welders for that extra piece of mind. Included in each of our Service Bodies is a standard shelving package.

### STANDARD STEEL BODY FEATURES:

- 12 gauge tops\*
- 16 gauge compartment sides and bottoms\*
- 10 gauge steel checker plate floor
- 16 gauge headboard\*
- Heavy Duty 12 gauge steel bumper with non slip step\*

\*Rust resistant Satincoat/Galvaneal steel

## What makes the Wilcox Body a Green Product?

To classify a truck body as a "Wilcox Green Body" it has to meet a certain criteria. It must be manufactured utilizing "green" processes, manufactured with "green" materials and finished product must reduce negative environmental effects.
